TECH TIP

To reduce external interference on your MicroWeigh indicator, be sure to re-twist and terminate the load cell shield wire into the Phoenix Contact block designated "SHD."

Plant View

WeighTech is currently field testing wireless communications between our MicroWeigh Bluetooth indicator and Tyson's Plant View program. This will eliminate the hassle of dealing with annoying cables, which get in the way and often require replacement due to the harsh environments of processing plants. In addition, since no cables are required, it will eliminate the worry of cable connectors becoming damaged during washdown.

The Hill Parts Sales Team

WeighTech is proud to welcome Hill Parts as new members of its sales department. The Hill Parts sales members will now be distributing WeighTech scales as well as their own products. The Hill Parts sales members include: (from left to right) Travis Starkey- South Central Sales, Sam Ferguson- Canadian and Remote Region Sales, Phil Foster- Southeastern Sales, Greta Holloway- Inside Sales, Billy Bradley- Northeastern Sales, and Rick Boze- Sales Manager. WeighTech President, Steve Tull said, "I am very pleased with the new addition to our sales department. This should be a golden opportunity for WeighTech to establish a larger customer base." Hill Parts is located in Ball Ground, Georgia and specializes in the manufacturing of spare parts for a variety of poultry processing machines.

Who We Are

WeighTech has over 20 years of experience in the design, development and service of scales and specialty equipment. WeighTech has earned its reputation as a trusted supplier of reliable and affordable products that meet and exceed customer expectations.
