WeighTech Adds New Production Enhancements

January 9, 2007 – Waldron, AR - WeighTech announced today the addition of an Amada Laser Production Tool for use in fabrication of processing equipment.

The Amada Pulsar 2415 model was purchased to shorten lead times and speed up production in the growing demand for WeighTech's processing equipment. The laser will complement WeighTech's existing production capabilities at its Waldron, AR headquarters.

In addition to the Amada laser tool, WeighTech announced the addition of five Chevrolet HHRs for its sales/service fleet. The vehicles carry the company colors of blue and grey.

About  WeighTech™
